Analytical Solute & Heat Transport Model (ASHTM)

Release Notes

A Graphical User Interface (GUI) for the Analytical Solute and Heat Transport Model (ASHTM), prepared by RTI International (RTI) and APTIM Federal Services, LLC (APTIM) for the U.S. Environmental Protection Agency (EPA).

Release Version: 1.0.0.0

Release Date: July 2024

Backend Analytical Model: T3Di1.3.05

Application Files

This release consists of the following -

- Installation files: The “Application/…exe.zip” directory contains the portable version of the application, which can be used to launch the GUI using the ASHTM executable. An installation version of the application is included in the “Application/…setup.zip” directory.
- Tutorial files: “Tutorials.zip” directory including examples of model input and output files.
- User manual: ASHTM_UM.pdf
- User Instructions: App C User Instructions T3Di1.3_rev 7-14-2024.pdf

Download Location

Please contact your EPA official to obtain the download link.

Installation Instructions

Use either of the following two options to install this application on a Windows machine:

1. Installation using the Setup Executable:
   - Run the “setup.exe”' file.
   - Select the “Install” option on the setup screen.
   - Follow the installation instructions as they appear on the subsequent screens.
   - If the installation is successful, the “ASHTM” program will be added to the list of programs accessible via the Windows Start Menu.
2. Portable version using the zipped folder:
   - If you receive the program as a zipped folder, simply extract the folder to your preferred location.
   - Run “ASHTM.exe” to start the program.

During the installation process, the user may be required to install the Microsoft .NET Core App (version 6.0) framework if it is not already installed on the Windows machine. This framework can be downloaded separately from the Microsoft website or can be installed automatically during the first-time use of the program when prompted by the application.

Tutorials

Unzip the archive with tutorial files ("Tutorials.zip") into a selected folder. Launch the application and open the model files (*.t3d) to view the respective inputs and outputs in the interface.

User Manual

The user manual can be accessed through the interface using the help option. Alternatively, the PDF file can be directly opened from the "User_Manual" directory.

Contact Information

The main contact person for this application is Patrick Kelly, EPA <kelly.patrickj@epa.gov>. However, the project team at RTI International (Anurag Srivastava <anuragsrivastav@rti.org>, Fekadu Moreda <fmoreda@rti.org>) or at APTIM (Tomas (Tom) Perina <tomas.perina@aptim.com>) are available to receive feedback or answer any queries regarding this application.
